

QUALITY INTERNATIONAL SERVICES

COMPANY PROFILE

WE ARE ...

Quality International Services is a 23 years young organization having operations Pan India. We pride ourself of having executed and delivered projects across India. QIS is operating in the dynamic IT field evolving and adapting to latest technologies. We design ,optimize ,supply ,execute and maintain projects with a zeal of ownership and pride.

QIS has adopted to latest technologies in IT domain, Security & Surveillance ,Audio-Video ,Imaging ,Fire Detection & Safety. It has crafted customized solutions for its client to have the cutting edge in their business over competition .

ARTIFICIAL INTELLIGENCE , as world and organizations are grasping to understand it , we on the other hand have already deployed AI based solutions for our clients i.e. QIS.

DESIGN

We have an inhouse design team to support our clients in optimizing and designing solution as per their requirement. Our expertise in designing is in...

- **Structured IT Passive and Active design**
- **Surveillance & Security - CCTV ,Access control, intrusion**
- **AI Based Video Analytics Solutions**
- **Audio & video -PA system ,Conference Room ,Auditorium etc**
- **Fire - Smoke Detection , Gas Suppression System, VESDA**
- **Electrical - Low Voltage Electrical Design**

Design team choose products from various renowned OEM's who are partner with us to provide a cost effective solution without losing the essence of the objective.

HARDWARE SUPPLY & INSTALLATION

We suggest ,Procure , Install & Maintain Hardware for our clients while they can focus on their Core business . We not only supply Assets but also accessories which we maintain in stock in consultation with our clients.

We are Partner 's for majority of the leading brands in our domain area of IT ,Surveillance & Security ,Audio & Video , Fire & electrical who support us for timely deliveries . In many cases we do import materials across globe as per our client's requirement and forecast .

SOLUTIONS

ARTIFICIAL INTELLIGENCE

QIS has been investing and working in the Domain of artificial Intelligence for last two years and have collaborated with various Organizations & Startup 's in addressing to the requirements of our clients and also generating more generalized solutions which can be customized and merged with other solution's . The area's where we can provide AI backed solutions are:-

- **Vehicular Analytics**
- **Law Enforcement Analytics**
- **Urban & Municipal Analytics**
- **Industrial Safety & Health Analytics**
- **Radar Based Surveillance**
- **Retail & Tracking Analytics**
- **Fire & Smoke Analytics**
- **Forensic Investigation & Smart Search Analytics**
- **Industrial automation with AI**
- **Warehouse Management Analytics**

& Many More

While implementing the AI Solutions we try to optimize by using existing hardware wherever it is possible

OUT OF BOX

Smart Environment : We as an organization believe in giving back to nature and protecting it where ever possible .We have planted lot of trees and contributed to afforestation projects with lot of NGO's who are working in this domain. We have also collaborated in many technology projects some being first of its kind to protect our flora ,fauna & wildlife .

- 01. JUNGLE FIRE PREDICTION & PREVENTION:-** We collaborated with Brazillian - AI Software company deploying their Patented software in the Jungle of Simlipal in Orissa, home to largest population of Tigers in India and one of the densest forest, spread over 3500 sq. KM .In the first phase we have deployed 5 PTZ Cameras with zooming of 20 sq.km on top of 30 mtr tower connected through RF .With the help of the software and cameras we have been able to prevent many jungle fire's in the covered zone . **This is the first of its kind of deployment in India.**
- 02. POLLUTION MONITORING:-** In Paradeep Indian Oil Refinery we are monitoring the air pollution of chimnies emission using patented software and using high resolution cameras which are able to capture the density and level of air pollution.
- 03. PREVENTING MAN AND ANIMAL CONFLICT:-** Using high resolution Thermal camera's with night zooming to 4km at night and using AI software behind. We have been successful in prewarning forest guards to prevent such conflicts.
